DETAILED ACTION

Response to Amendment

- 1. Amendments to claim 1, filed on June 24, 2005, have been entered in the aboveidentified application.
- 2. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 102

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Ishida et al. (U.S. Patent No. 5,554,440) for the reasons of record as set forth in Paragraph No. 4 of the Office Action mailed on January 21, 2005.

Regarding the amended limitation "and further wherein a deposition range is ... $\alpha i - \alpha f \le 25^{\circ}$ ", the Examiner notes that this limitation(s) are/(is a) process limitation(s) and is/are not further limiting in terms of the structure resulting from the claimed process. Specifically, in a product claim, as long as the prior art product meets the claimed structural limitations, the method by which the product is formed is not germane to the determination of patentability of the product unless an unobvious difference can be shown to result from the claimed process limitations. Furthermore, in the instant case, Ishida et al. explicitly disclose controlling the deposition incidence angle to meet applicants' claimed limitations since the Θ disclosed by Ishida et al. *is* the deposition incidence angle, α , claimed by applicants (*col.* 6, lines 5 – 39).

Response to Arguments

4. The rejection of claim 1 under 35 U.S.C § 102(b) – Ishida et al.

Applicant(s) argue(s) that "the prior art does not teach or suggest this range" (page 3 of response). The examiner respectfully disagrees.

See rejection of record above. Ishida et al. uses a different symbol to refer to the deposition incidence angle, but explicitly teaches controlling the initial and final (α i and α f, respectively) incidence angles to be within 25° of each other (e.g. Figures 16, 17 and 19).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kevin M Bernatz whose telephone number is (571) 272-1505. The examiner can normally be reached on M-F, 9:00 AM - 6:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Carol Chaney can be reached on (571) 272-1284. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
